I. OPEN DISASTERS/EMERGENCIES: NSTR

II. WEATHER:

Today's Forecast:

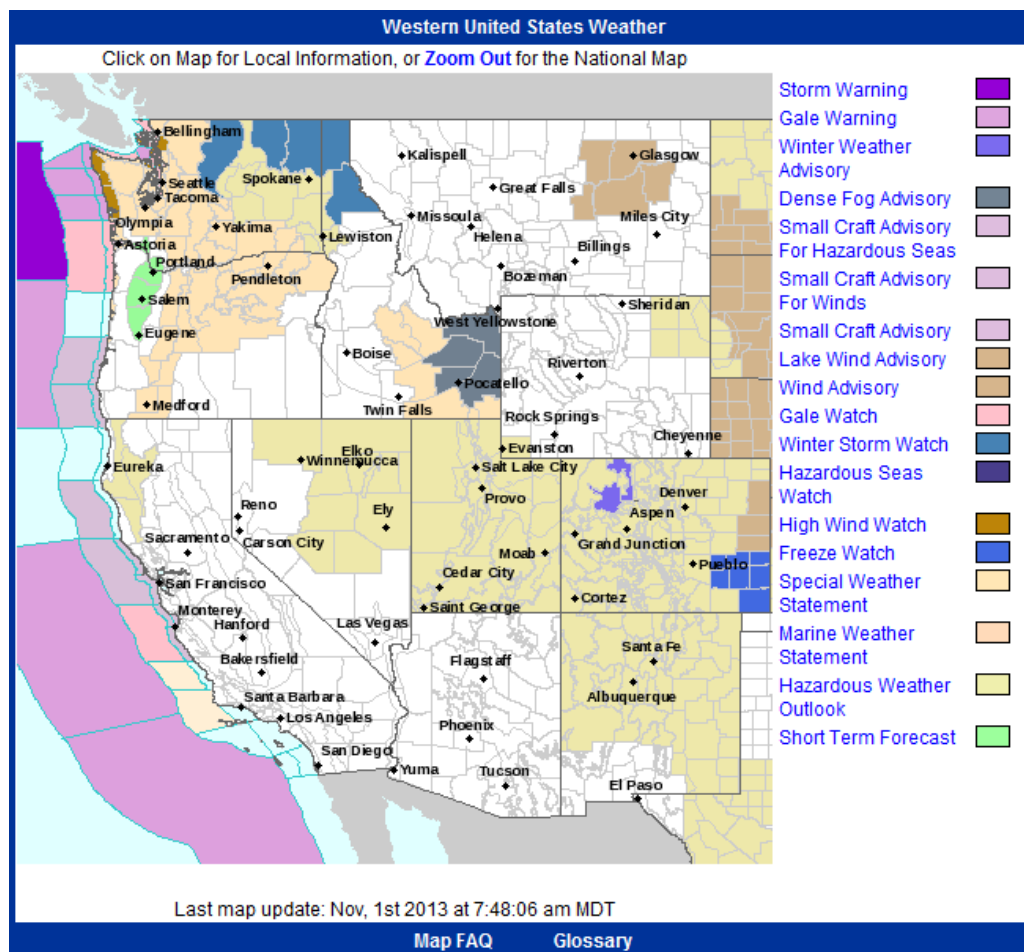

Northern California

High pressure will continue to build over the region with dry and warmer weather today through Friday. Another storm system will bring a chance of precipitation and cooler temperatures this weekend.

Southern California

High pressure and redeveloping offshore flow will continue to warm daytime temperatures through Friday. A cooling trend will begin Saturday and continue through Monday as a trough deepens across the west.

State Weather Map:

NWS Western Region Winter Weather Briefing for California

NWS Western Region has provided a short video on the temperature and precipitation outlook for this winter across California. NWS will provide this report to Cal OES monthly or as significant changes in the forecast occur.

Summary of Briefing:

- * La Niña, El Niño neutral year, therefore there is an average chance of precipitation and average temperatures.
- * 2013 has been the driest year on record in 118 years
- * Reservoirs are well below average storage levels.

Here is the link to the briefing:

III. FIRES:

Overall Fire Risk:

Northern California

Fuels will be drying today in all areas. Saturday's weather system will begin to moisten fuels in the northern quarter of California, and fuels there will generally have a difficult time drying after that. For the rest of the Geographic Area, fuel dryness will be near early November norms, with conditions remaining between Dry across lower elevations and Moist across higher elevations and northern areas. The potential for large fire will be low over northern California through Thursday.

Southern California

Little or no fire activity is expected across the region through Monday due to light winds through Saturday followed by cool, humid conditions Sunday and Monday. The potential for large fire will become low over Southern California Tuesday and Wednesday as weak offshore flow surfaces. Expect light initial attack activity across Southern California Tuesday and Wednesday.

Preparedness Levels:

National Preparedness Level 1

Northern California

Preparedness Level 1 Multi-Agency Coordination System MACS Mode 2

Southern California

Preparedness Level 2 Multi-Agency Coordination System MACS Mode 2

IV. SIGNIFICANT ACTIVITY:

Tsunami Information Statement, 6.6 Magnitude Earthquake, Chile: (New/Final)

On 10/31/13 at 1610 hours, a verified 6.6 magnitude earthquake occurred near the coast of central Chile. Per the National Tsunami Warning Center (NTWC), based on location and magnitude there is no tsunami danger for California (no Watch, Warning or Advisory). CSWC briefed California Coastal Counties via the California Warning System (CALWAS).

Northern California:

Governor Brown Declares State of Emergency in Shasta County

On October 31, 2013, Governor Edmund G. Brown Jr. issued an emergency proclamation for Shasta County following the recent wildfire of September 9, 2013 that destroyed residences and other structures and caused evacuations.

Southern California: NSTR

CAL OES MISSIONS:

New Missions: NSTR

Ongoing Missions: NSTR

Closed Missions: NSTR

EMAC Colorado (No update)

2013-SOC-1196, Three (3) Public Assistance staff from Cal OES Recovery are deployed to Colorado and their deployment has been extended from 15 days to 30 days. The deployment is scheduled to end 11/5/13. The Team Lead will check in each morning with the CSWC

2013-SOC-1417, Four (4) Public Assistance staff from Cal OES Recovery are deployed to Colorado beginning 10/28/2013 and ending 12/2/13. Public Assistance personnel are paired with FEMA Crews for communities declared in the disaster.

Staff to be deployed November 12, 2013

Two additional Disaster Assistance Program Specialists will be deployed November 12, 2013.
